	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Loop statements till the correct word is picked ● A temporary word bank to see if it works before API is added ● A scanner to get the user input from Terminal	**Schedule - (For V2.0+)** ● Letters being colored showing which letter is correct, in the word or in the wrong spot, or not in it ● Making sure it's the right length ● Messages saying you win or you lose
Not Important	**Delegate - (Use a library)** ● API/JSON going to NY Times to grab the Wordle of the day ● ANSI Escape Codes to color the letters ● (Temporary) Random word module	**Delete - (Cut it)** ● A timer, timing how fast you were ● It able to be played in competition with other people ● Keeping score
